Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-6 are, drawn to an apparatus, classified in class 119, subclass 428.
- II. Claims 7-35 are, drawn to a , classified in class 119, subclass 428.

Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination(wireless transmitter) as claimed because a hard wired system can be used. The subcombination has separate utility such as controlling various feed amounts to a different animals.

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

A telephone call was made to Derek Martin on 7-12-2004 to request an oral election to the above restriction requirement, but did not result in an election being made.
